In Focus

THE TEAM OF TSF

SURGICAL EXCELLENCE

The camp brought advanced surgical expertise to patients requiring specialised spine care, including deformity correction, revision procedures and minimally invasive techniques designed to improve outcomes & recovery

KNOWLEDGE IN MOTION

A moment of mentorship,
Dr. Shekhar Bhojraj
engages with the next
generation of spine
care practitioners

Before the surgeries began, Dr. Shekhar Bhojraj took a moment to address the room. Addressing resident doctors and local specialists gathered at D.Y. Patil Hospital, he spoke not just about technique but also about responsibility. "Spine conditions left untreated don't just cause pain; they rob people of their dignity and independence. Our mission has always been to ensure that geography is never a barrier to good spine health."

For the doctors in that room, it was as much a masterclass in purpose as it was in medicine.

ACCESSIBLE SPINE CARE FOR ALL

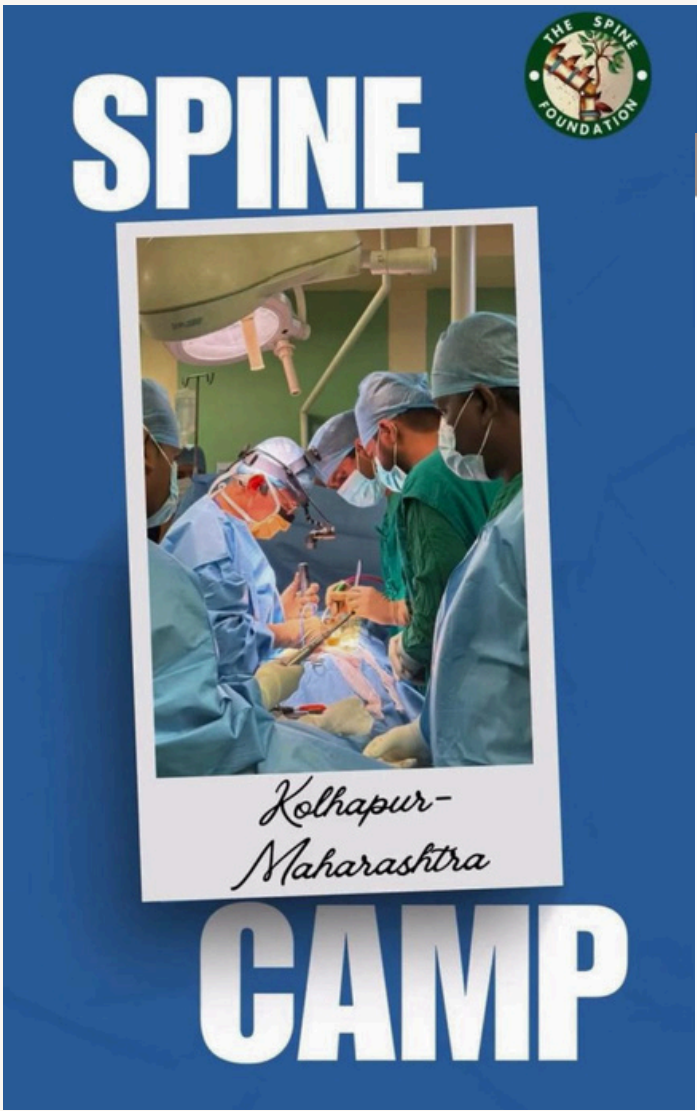

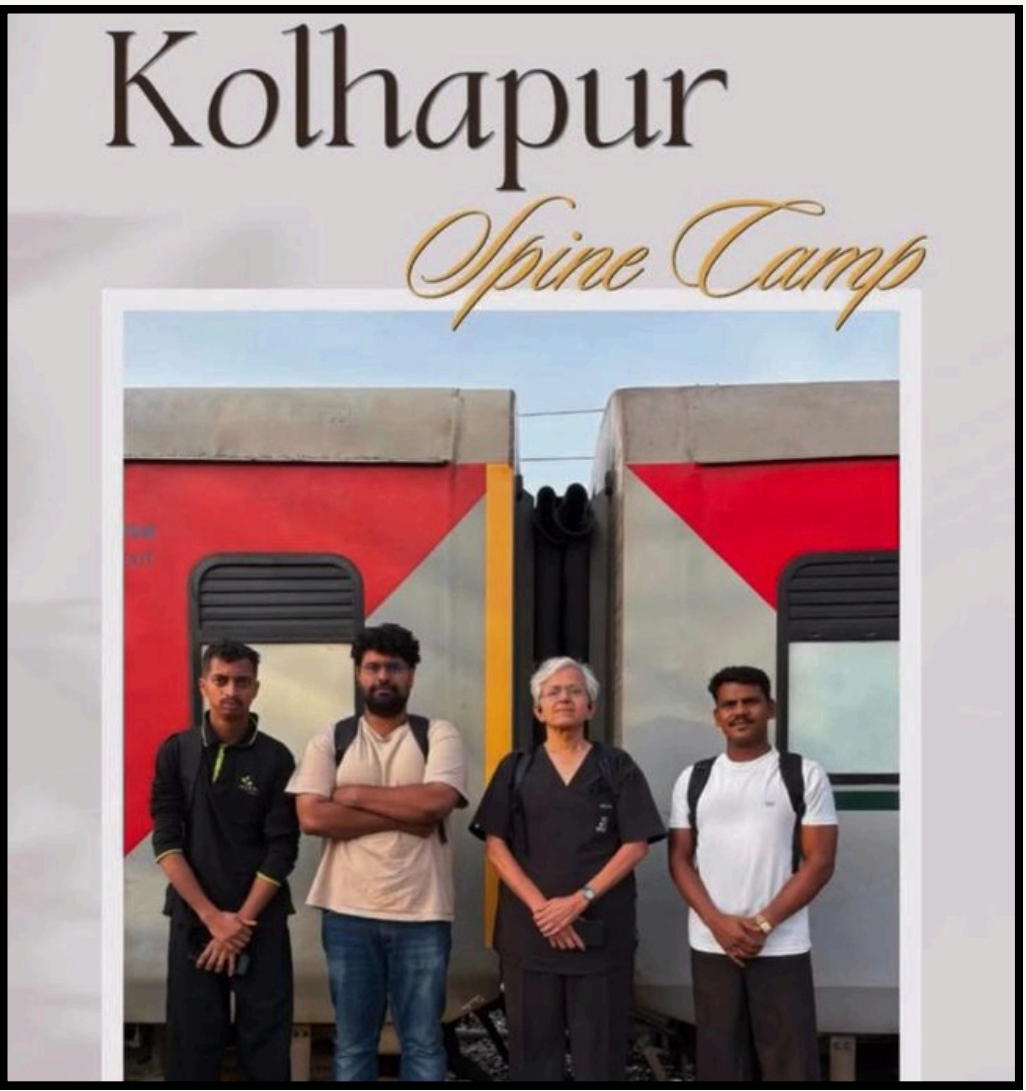

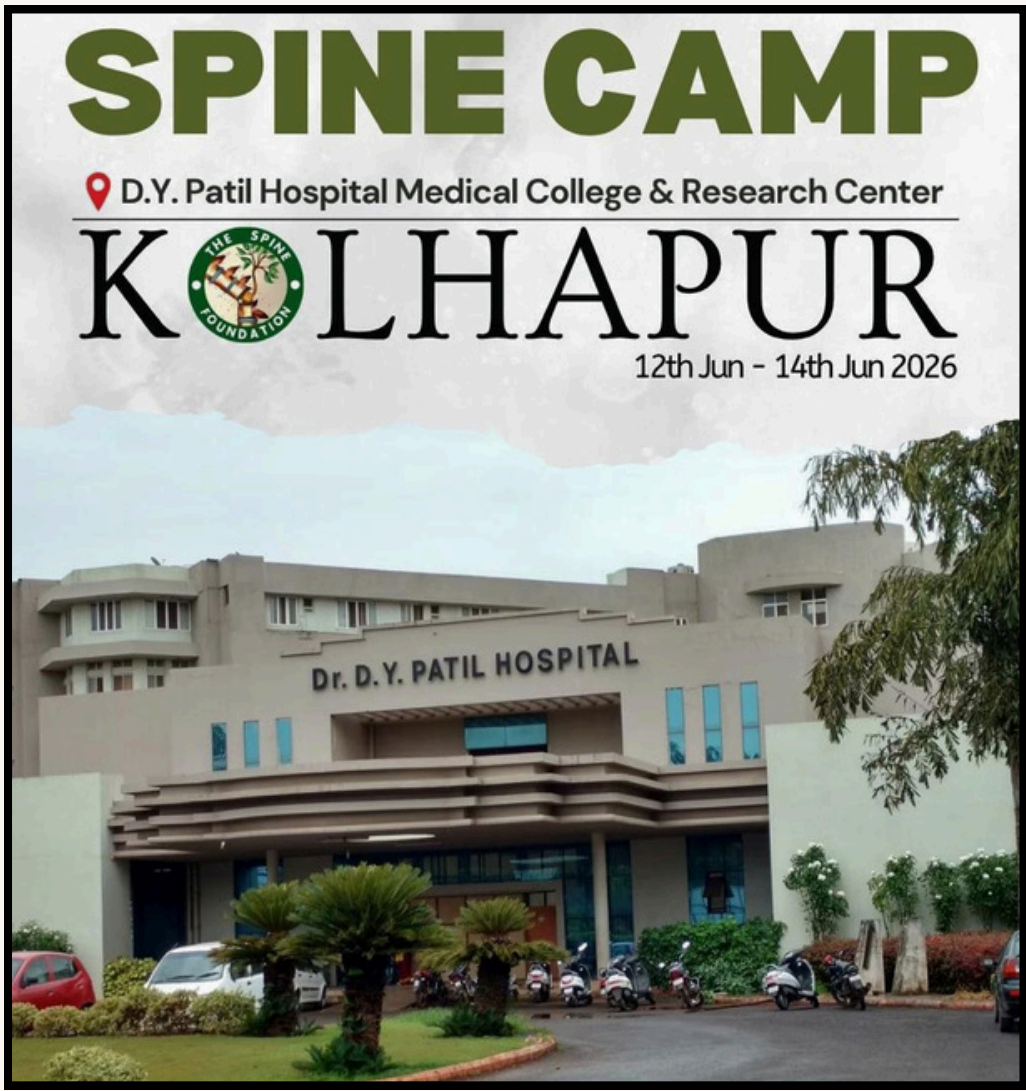

The Kolhapur Camp

The Spine Foundation's recent medical outreach camp in Kolhapur successfully delivered specialised spine care directly to patients in rural and smaller urban areas. By offering local expert consultations, the initiative eliminated the need to travel to major metropolitan centres, helping patients understand the root cause of their pain and strengthening regional healthcare accessibility and education.
